Hi Gary –

We will do what you want. I am thinking 2 might be enough – one east of SE corner and one north of SW corner. I don't see anyone approaching it from the north or west as those are wetland areas with no access.

Thanks.

Eric

Eric,

Good question - perhaps 4; 2 for the south side of the former impoundments, then one each for the east & west sides. The north side shouldn't be much of an issue, so maybe just put a generic no trespassing sign(s) on the fence once its built for the north side. Any thoughts?

Thanks,

Gary

Thanks Gary. How many signs were you thinking we would need?

Eric

Subject: Gulfco Signs

Eric,

To followup on todays call, attached is an example sign picture just as one example. The signs should include the following information:

“U.S. EPA Superfund Site”;
Site name;
“No Trespassing”;

“Warning: Hazardous Substances Present”; and

“For Further Information Contact the U.S. Environmental Protection Agency at (800) 533-3508”.

As we discussed, the signs should be fairly large, at least sized approximately 2½ feet by 3½ feet or larger.

Please let me know if you have any questions/comments on this.

Thanks,

Gary Miller
